# Do You Know the Dangers of “Universal Background Checks”?

Some people are now pushing for “Universal Background Check” (UBC) laws, where all gun transfers, even private gifts between friends & family, must go through a gun dealer. While UBC laws may sound harmless at first glance, they are NOT.

To be able to enforce UBC laws, the government will have to implement a gun registration scheme, followed by “compliance inspections” in your home to verify that you registered all your guns and that you still have them. Even non-gun owners could be required to register as such, and be subject to home inspections for verification, too.

Confiscation is easy once the government knows exactly which guns you own. And you’d better have only the registered guns when the government knocks on your door!

In Washington State, Michael Bloomberg's money was used to mislead the public into supporting a UBC law. Now, Washington gun owners can’t even loan a gun to a friend at the range without both of them undergoing a background check!

The days of selling a gun to a friend or acquaintance in your own living room, or anywhere except at a gun dealer's place of business during normal business hours, would be over. There will be transfer fees, paperwork, and delays. The nearest gun dealer could be far away and might not even handle private sales!

**GET THE WORD OUT - THIS MUST NOT BECOME LAW IN VIRGINIA!**

It’s critical that all voters understand the dangers and realities of UBC laws **NOW!** Don't let anyone, especially a fellow gun-owner, say that UBC laws are no big deal!

UBC laws criminalize all non-dealer private gun-transfers, lead to registration, compliance inspections, and ultimately to confiscation. They are a big deal and statements otherwise must not go unchallenged.

Hand out copies of this flyer and educate everyone you know. Do it now, while there's still time, or pay for it later when the media is flooded with Bloomberg-sponsored lies. Freedoms that are lost are often lost forever.
